Course Outline — L2, Summer 2020
Mon & Wed & Fri 2:00–4:50 pm

1 Instructor information

Name: Hui WANG
Contact: hwangcr@connect.ust.hk
Office: LSK 5017

2 Course Objectives

This course introduces students to professional accounting and its roles in business and society. This course is designed as a common core course for students without any accounting background. It has a one-way exclusion to ACCT2010 and ACCT2020. While covering similar topics and aspects of accounting, this course is different from the 2000 level courses by focusing not on the mechanics, but more on the purposes, features, and values of different accounting practices to businesses and the society. The increasing use of principles-based accounting standards and the ethical issues thereof will be highlighted for students' attention. There will also be extensive cross-referencing with real-life incidents in this course, from which students will get to know how accounting relates to things happening in businesses and the society around them. For course assessment, students will be required to demonstrate abilities to understand, explain and evaluate how contemporary accounting practices may fulfill its expected roles in business and society.

Upon completion of this course, students will be able to:

1. Outline the broad framework of ethics, corporate governance, and corporate social responsibility, while demonstrating the knowledge and respect of ethics and ethical standards in accounting in particular
2. Explain the roles of accounting in business and social contexts; and their bearings on corporate social and environmental accounting
3. Identify the different users of accounting information and their information needs; and generalize how such needs can be catered for in financial statements.
4. Point out and describe broad aspects of appropriate accounting treatments for different transactions of different organizations, and how such may address stakeholders' information needs.

5. Read, interpret, and analyze financial statements that include the balance sheet, the income statement, and the cash flow statement.

3 Reading

Required Textbook (HSEP):

Hornngren, Charles T., Sundem, Gary L., Elliot, John A., and Philbrick, D., "Introduction to Financial Accounting", 11th edition, Pearson New International Edition, 2014.

Other References:
